# Refinements Included in the Final Product

Also, I collected user feedbacks for both prototype – 2 and the final multimedia product was created according to the given feedbacks. All the feedbacks were taken into account and the information's received from the questionnaires were taken into consideration before the final multimedia product was created. According to the feedbacks and comments were given by the test users and clients, the following changes were done to the product.
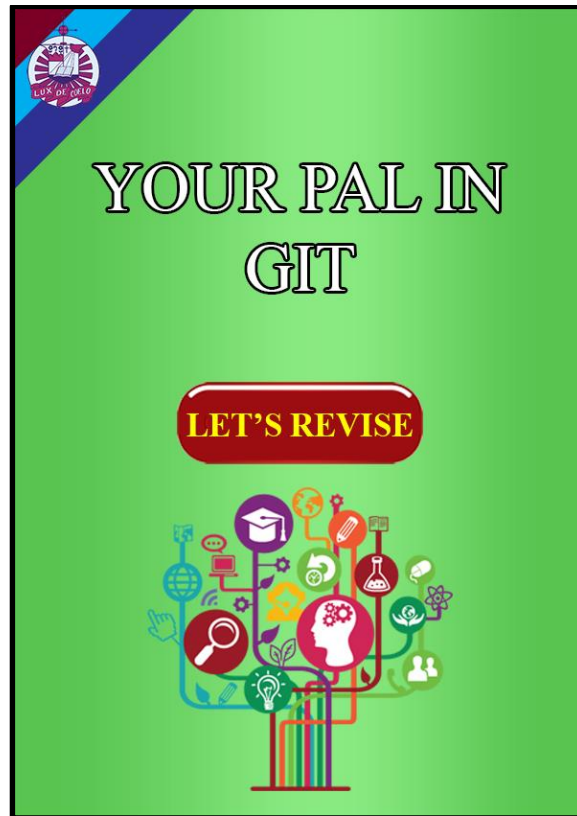

Refinements made on the Cover Page

PROTOTYPE – 1   PROTOTYPE – 2

The layout of the cover page of the 1st prototype was changed according to the received suggestions and comments. Both the management committee and the test users proposed changes such as background colour changing, cover page picture changes, etc. Therefore after analyzing all the comments and suggestions. I made a decision to use a shade of green background because the previous background of the 2nd prototype was too bright. I was also done changes to the picture since some users suggested that the cover page picture is dull. Also, the border also removed according to the user's comment.

After making above changes the cover page of the final product was made and shown in the above picture.

FINAL PRODUCT

SHORT NOTES

ACTIVITIES

once the second prototype was presented, few changes to the home page were suggested and they were adding few multimedia components and removing the red glow of the clip arts of both short note and activities buttons. Since the clients and test users satisfied with the prototype 2 and suggest a few improvements those were done.

## Refinements made to the Content Page

PROTOTYPE – 1

PROTOTYPE – 2

According to the feedback and comments I receive it was suggested to add some pictures to the short notes page. Therefore I added the most relevant pictures for some pages in the short notes section. However, there were no many changes since clients were satisfied with the prototype 2 and gave only a few suggestions to the activities page of the final multimedia product.

## Refinements made to the Question Page

Tablet PC

All of the above

POINT   1

STATUS ....

SHORT NOTES

Activities section of the product was changed by adding score calculater. Also the layout of the activities section was changed since the client stated that the activities section and shortnotes section look like same. A comment will be appeared once a student completed the quiz. So then he can see whether his knowledge is good or not. Each right answer gives one point and the final results will be estimated from overall points for the all questions. However, I sure that I was able to maintain the consistency even customer requested to make few colour changs to the activities section throughout the product. Finally, I was able to developed the final multimedia product by satisfying customer needs and requirements.
